## Fully integrated diagnostic support system

**Autologic Assist** is believed to be the industry's first fully integrated diagnostic support system. It combines the expertise of more than 100 dealer-trained technicians with state-of-the-art technology and access to online third-party vehicle data that's delivered via a multifaceted, single-screen device. This simultaneous integration of these data resources and diagnostic tools, coupled with real-time access to technicians that specialize in European vehicles, gives repair shops a competitive edge, allowing technicians to detect and repair vehicles quickly with fewer mistakes.

## Internal damping reduces vibration

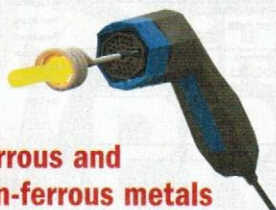

The **Florida Pneumatic AIRCAT**

**Air Hammers**, Nos. 5100-

A-T and 5200-A-T, feature the company's patented muffler system and handle grip that reduce noise levels and increase operating comfort, respectively. This series of Air Hammer has internal damping that reduces the vibration level to 4.25 m/sec<sup>2</sup>. Weighing 3.3 lbs and measuring 7.6" long, the 5100-A-T has a 2-5/8" piston stroke and delivers 3,000 blows per minute. The 5100-A kit offers the tool packed in a blow molded storage case along with five chisels and an additional optional spring-type chisel retainer. Measuring 11" and weighing 4.4 lbs, the 5200-A-T has a 3-3/4" piston stroke and 2,100 blows per minute. Both models are fitted with a "ball lock" chisel retainer.

## Heats ferrous and some non-ferrous metals

The **Induction Innovations Mini-Ductor Venom** heats ferrous and some non-ferrous metals without the danger of an open flame using invisible heat. This tool will turn a 3/4" nut red hot in 15 seconds. This tool can be used to easily release seized nuts/bolts from corrosion or thread lock compounds; remove/release steering/suspension components, fuel tank straps, inline connectors and much more. The kit includes the Mini-Ductor Venom, manual, carrying case and three basic coils.

## For fused circuits

The **Cal-Van Tools 72 AmpHound 2** offers real-time readings of current and amps in a fused circuit without removing the fuse. The 72 AmpHound 2 works on Mini-LP and Micro-Fuse fuse types, as well as with mini, standard and maxi fuse types. To use, attach the adapter to the fuse, or touch the probes to the top of the fuse. The tone alerts users when the tool is touching the fuse, removing guesswork, and making under-the-dash fuse work simpler, according to the company.
